User:

1. As a **user** I want to submit a report on water availability so that one can find water sources. (Anushk)
2. As a **user** I want to view available water sources so that I can view submitted water sources.

Worker:
1. As a **worker**, I want to report on water purity levels so that users and I can know where clean water is. (Roy)

Manager:
1. As a **manager**, I want to view historical reports and trends of water purity so that I can manage the application and use the information for future usage.
2. As a **manager**, I want to have authorization to delete individual reports that I deem inaccurate, so that I can increase the application's reliability on finding the right water sources. (Joon)

Administrator:
1. As an **administrator**, I want to delete any accounts, so that I can have control over user accounts upon user request.
2. As an **administrator**, I want to ban a user from submitting reports, so that I can have control over unwanted fraudulent behaviors from users such as spamming and phishing. (Joshua)
3. As an **administrator**, I want to unblock an account that has been locked for incorrect login attempts, so that I can efficiently solve problems with the user login. (Timothy)
4. As an **administrator**, I want to view the security log, so that I can secure the system and identify any security problems related to system penetration.
